

SPECIFICATION SHEET

GUARDX BOARD CONTRACTOR GRADE HEAVY DUTY

PRODUCT OVERVIEW

GuardX Board – Contractor Grade Heavy Duty is a professional-grade temporary surface protection solution engineered for demanding commercial and residential construction and renovation projects.

Built for real jobsites, GuardX Board delivers the ideal balance of breathability, durability, and impact resistance—helping prevent costly surface damage, callbacks, and rework.

Each roll is precision-manufactured for consistent performance, easy handling, and fast installation. Made from 100% recycled material, GuardX Board is flexible, tough, and reliable under heavy foot traffic and equipment use.

INSTALLATION INSTRUCTIONS

1. Ensure the subfloor (base floor) is clean and dry.
2. Remove the paper wrap from the GuardX Board roll.
3. Roll out GuardX Board over the surface with the logo side facing up.
4. Cut to length using a utility knife, keeping seams neat and tight.
5. Tape butt joints, long joints, and perimeter using any brand joint tape.
6. Do not apply tape directly to finished floor surfaces.
7. Apply any brand edge tape along the outer perimeter of the protected area.

USES
