

SPECIFICATION SHEET

GUARDX BOARD RENOVATOR GRADE STANDARD DUTY

PRODUCT OVERVIEW

GuardX Board Renovator Grade – Standard Duty is a reliable temporary surface protection solution designed for residential renovations and shorter-term commercial projects.

Engineered to balance breathability, durability, and lightweight handling, it helps protect finished surfaces while supporting efficient workflows—reducing the risk of damage, delays, and rework.

Precision-manufactured for consistent performance and easy installation, each roll is flexible, easy to score and fold, and performs well under light foot traffic and wheeled use. Made from 100% recycled material, it's a practical, cost-effective choice trusted by renovators.

INSTALLATION INSTRUCTIONS

1. Ensure the subfloor (base floor) is clean and dry.
2. Remove the paper wrap from the GuardX Board roll.
3. Roll out GuardX Board over the surface with the logo side facing up.
4. Cut to length using a utility knife, keeping seams neat and tight.
5. Tape butt joints, long joints, and perimeter using any brand joint tape.
6. Do not apply tape directly to finished floor surfaces.
7. Apply any brand edge tape along the outer perimeter of the protected area.

USES

Designed to protect:

- Hardwood & engineered wood
- Tile & porcelain
- Marble & granite
- Stone & coloured concrete
- Vinyl, carpet & linoleum
- Walls, countertops, stairs & high-traffic areas
